The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Vanden Bussche et al patent 6,655,829.

Vanden Bussche et al disclose microfluidic mixer apparatus and method of using such apparatus (see especially column 1 and column 11, lines 1-19). The disclosed apparatus comprises a substrate having a central mixing aperture 14 being the terminating point of plural channels 10, 11, 12 intersecting thereto at various oblique and tangential angles to effect swirling mixing within the aperture (see especially the Abstract, figures and column 4, line 18-column 5, line 10).

Regarding claims 2 and 6, see column 10, lines 55-65 concerning a covered layer and centered outlet port (see also column 14, lines 27-29).

Regarding claims 3 and 7, varied materials of construction are covered at column 10, lines 55-65.

Regarding claims 4 and 8, varied aperture shapes are discussed at column 6, lines 8-25.

Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, within the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Art Unit: 1723

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kopf-Sill patent 6,186,660 is of interest with regard to canceled claims 17 and 18 (column 11, lines 44-61).
